

Samsung 323T LCD Display LCD with Integrated Multi-Input Display

The 323T is perfect for presentations of any sort – from airport flight information & stock market news to commercial displays and any other continuously running information or applications. Take the 323T into the corporate boardroom and open up your videoconferencing world with Picture by Picture capability as well as Picture In Picture useful for viewing both PC and video simultaneously.

The Samsung SyncMaster 323T is a stunning 32" digital display, engineered brilliantly for both the Pro AV and corporate marketplaces. With a slightly smaller size than our industry leading 40" display, the 323T provides unlimited viewing applications while weighing 17Kg and standing only 3.9" deep.

Offering variable aspect ratios including 16:9 for HDTV viewing, panorama view, zoom, and 4:3 for PC-based applications, the 323T is built to suit your viewing needs – whatever they may be. It also features a 1280 x 768 resolution, 500:1 contrast ratio, brightness level of 450cd/m², a fast 23ms response time, and an extra wide H/V170° viewing angle. Add user-friendly on-screen graphics, a universal remote, and an anti-reflection filter that ensures clear, vibrant text and saturated color, and you'll find the 323T in a class by itself.

The 323T features composite, component, and S-video for DVD and HDTV at 480i/, 720p and 1080i viewing, and analog RGB/BNC & digital input for the PC. Supports mini-phone stereo audio to route your PC sound through the monitor. Included is Samsung's 3 year parts and labor warranty.
